

GTEX (Game Token Economy & Exchange) platform is committed to become the world's first digital asset distribution platform in the field of gaming. Based on blockchain technology and smart contract mechanism, GTEX will help achieve the tokenization of various virtual game assets and provide an adequate flow of rights and assets on the platform. GTEX is bringing real world economy to the virtual world by enabling gamers to buy, sell, trade and invest in the gaming ecosystem.

## GTEX PLATFORM IS CONSTRUCTED FROM 4 COMPONENTS:

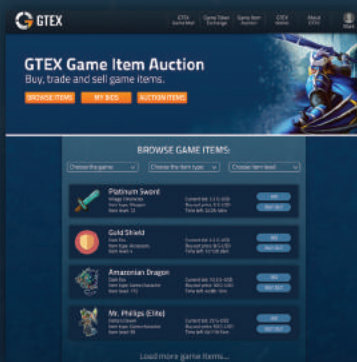

### GTEX GAME MALL

The GGM is a decentralized game distribution platform that provides game developers with an effective way to reach players directly.

### GTEX WALLET & IDENTIFICATION SYSTEM

GWIS enables users to access both wallet and game assets across the decentralized GTEX ecosystem.

### GTEX GAME ITEM AUCTION

The GTEX Game Item Auction is a secure platform enabling gamers, investors and game developers to trade game assets and game tokens.

### GTEX EXCHANGE

The GTEX Exchange enables gamers, investors and developers to buy, sell, auction, trade and invest on a single platform.

# WE BUILD VIRTUAL GAMING ECONOMY.
